Preparation

All surfaces must be clean, dry, sound and free from dust. Remove all loose and defective paint then brush, scrape and remove dust from the surface. Thoroughly clean the surface a suitable cleaner and degreaser. Examine all old surfaces prior to application in order to determine the nature of the preparation required.

On rusty surfaces: First remove rust then prime with Leyland Trade Anti-Corrosive Metal Primer.

On porous surfaces: First apply Leyland Trade Stabilising Damp Treatment as directed.

For further advice contact Technical Advisory on 01924 354354.

Application

Cut the tape to the desired length and remove the silicone paper.

Apply the tape using strong pressure of the hand expelling any air bubbles as you go. Ensure that the corners are well bonded. Take all the necessary safety precautions when working at height. For extra protection, overcoat with Leyland Truguard Roof Repair and Waterproofer.

Take all the necessary precautions when working at height.
